

16 January 2010

To Whom It May Concern:

Cimeco engaged Great Northern Construction as a sub contractor in 2009 for work on the Dampier to Bunbury Natural Gas Pipeline (DBNGP) – Stage 5B Project.

GNC hired out Batch Plant Manager and Driver Clinton Carnell, and one of their Mobile batch plants for a period of 5 months between May and September 2009. It involved remote area work between Compressor Station 1 near Karratha through to Compressor Station 9 near Perth.

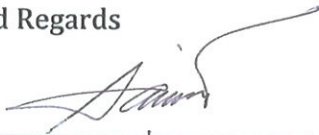

The work was completed within the timeframe allowed and to a high standard, as is expected by our company. Clinton successfully represented GNC on site and was awarded with a Performance Recognition Certificate for his valued contribution in assisting Cimeco complete the project, displaying a high level of professionalism and safe working culture (copy attached).

I must also add that Mr Steve Easton and the GNC office staff were a pleasure to deal with. Any issues which arose were immediately dealt with in an efficient and professional manner.

I look forward to working with Great Northern Construction on future projects and have no hesitation in recommending them to other companies.

Please do not hesitate to contact me if you require any additional information.

Kind Regards

Samir Derviskadic
